Projects:

LIBRARY   MANAGEMENT SYSTEM

Client	:	Halifax Library (Canada)
Roles and Responsibilities	**:**	Developed this application using spring-boot
Team Size	:	6

Description:

This project is all about Managing the library Data information in the application. We have user as Admin, who is responsible to add/view/delete books, issue and view issued books. The admin is authenticated with the username and password. Once the Admin logs in the system. The menu page opens whether to add/view/delete/issue/view issue books. As, per the request the admin performs the task and manages the system. And the added books will be visible in the user screen. Whoever gives the comments/suggestion/questions will be visible to the admin and will respond to the customer.

CUSTOMER COMPLAINT MODULE

Client	:	Versa Bank (Canada)
Roles and Responsibilities	**:**	Developed this application using Java
Team Size	:	7

Description:

This project is for used for handling the customer complaint request. The end customers raise complaints when they face any issue with accessing the application/or anything that they are not able to get it. We take the requests and route them to the specific teams. We have large team sets for different departments and they will be routed to the concerned team. We have batch jobs running at the end of the day to see how many complaints were raised. And analysis how many are completed, pending, or blocked.

TECHNOLOGY STACK
